What is **MicroQuarz® Roc?**

MicroQuarz® ROC is the continuous mineral coating that combines beauty, naturalness, and strength in equal measure.

From now on, quartz won't just be found deep within the mountains — you'll experience it in any space you choose.

What makes it unique?

- ▲ Natural decorative aesthetic, with exposed mineral
- ▲ Maximum resistance and durability
- ▲ Tailor-made finish in both colour and texture
- ▲ Waterproof and mould-resistant (ideal for bathrooms and outdoor areas)
- ▲ Cement-free: over 85% is pure quartz stone

Beauty and strength in pure quartz stone

Mountains are silent witnesses to the passage of time. They endure storms, relentless winds, and extreme temperatures without losing their majesty.

In our land, many mountains are a perfect conglomerate of mineral sediments and geodesic rocks that contain quartz crystals within. This unique composition is what we sought to recreate in MicroQuarz® ROC, where quartz makes up more than 85% of its formulation.

MicroQuarz® ROC stands out for its aesthetics and strength. Here, spherical quartz (with a grain size between 0.9 and 1.3 mm) takes center stage, emerging on the surface to reveal its mineral soul. There is nothing quite like it—neither in beauty nor in durability.

Thus, MicroQuarz® ROC becomes a constant evocation of nature in its purest form:

- ▲ Its surface offers a natural feel and texture
- ▲ The mineral is visible on the surface
- ▲ It has its own colour chart

Quartz crystals are one of those hidden treasures that rarely see the light of day. MicroQuarz® ROC is our tribute to the wonders concealed within our mountains.

Where do we recommend using it?

Given its properties and characteristics, MicroQuarz® ROC is ideal for any type of surface (including floors and walls) in:

- ▲ Homes and residential spaces
- ▲ Commercial centres, retail spaces, and offices
- ▲ Outdoor areas and spaces exposed to changing weather conditions

**Nature knows no limits,
so why should MicroQuarz® ROC?**

**Can modernity and nature go hand in hand?
MicroQuarz® ROC makes it possible.**
